The Student Information Systems (SIS) unit is a department within Student Academic Affairs (SAA). Its purpose is to serve SAA in the areas of information technology and software application development. While its main purpose it to provide a repository for UCSF student and applicant data to SAA and other UCSF units, such as the Library, the Graduate Division, and all of the other schools within UCSF, it also serves in areas such as classroom and learning technology, student health, and digital content management.

For more information, please contact Kevin Yeung [1] at 502-6463.
